

Shamir Progressive Lens Technology Comparison

SHA-PRG-5CMP-051623

Design	Autograph Intelligence®	Autograph III®	Autograph II+®	Shamir InTouch®	Shamir Spectrum+®
Technologies	 <p>Natural Posture™ Ergonomic design concept that minimizes need to tilt head to view reading material</p>	 <p>Natural Posture™ Ergonomic design concept that minimizes need to tilt head to view reading material</p>	 <p>Natural Posture™ Ergonomic design concept that minimizes need to tilt head to view reading material</p>	 <p>Natural Posture™ Ergonomic design concept that minimizes need to tilt head to view reading material</p>	 <p>Natural Posture™ Ergonomic design concept that minimizes need to tilt head to view reading material</p>
	 <p>Eye-Point Technology AI™ HEIM Technology enables us to design a lens that takes into account actual viewing angles computed for every distance</p>	 <p>Eye-Point Technology III™ Overcomes the problem of prescription related viewing experiences by simulating real-world views for any given prescription</p>	 <p>Eye-Point Technology™ Simulates how the eye will see through the lens and calculates optical performance of thousands of points in the lens</p>	 <p>Eye-Point Technology™ Simulates how the eye will see through the lens and calculates optical performance of thousands of points in the lens</p>	 <p>Eye-Point Technology™ Simulates how the eye will see through the lens and calculates optical performance of thousands of points in the lens</p>
	 <p>Close-Up™ Allows you to customize reading inset to individualize each patients' convergence</p>	 <p>Close-Up™ Allows you to customize reading inset to individualize each patients' convergence</p>	 <p>Close-Up™ Allows you to customize reading inset to individualize each patients' convergence</p>	 <p>Close-Up™ Allows you to customize reading inset to individualize each patients' convergence</p>	
	 <p>Intellicorridor™ Controls the power along the visual path, allowing us to create different enhanced zones</p>	 <p>Intellicorridor™ Controls the power along the visual path, allowing us to create different enhanced zones</p>		 <p>Intellicorridor™ Controls the power along the visual path, allowing us to create different enhanced zones</p>	
	 <p>As-Worn Quadro™ Uses custom measurements to compensate the prescription as well as reoptimize lens design based on position of wear</p>	 <p>As-Worn POV™ This new technology delivers sharp vision to all distances by compensating the prescription in front of the pupil to match to your personal point of view</p>	 <p>As-Worn Technology™ Uses custom measurements to compensate the prescription</p>		
	 <p>Visual AI Engine™ Applies artificial intelligence to design a lens specific to how patients with different add powers use their lens</p>				
	 <p>Continuous Design™ Uses research showing patients with different add powers have different needs and allows for 12 continuous designs for each add power</p>
